VISION FOR BIODIVERSITY

For the Strettons to endorse the recent global Biodiversity Framework

What is needed:

>> 1. Work with the council aiming for 30% of public land to be managed for biodiversity

>> 2. To engage with landowners and farmers to encourage regenerative farming, the restoration of hedgerows and space for wildlife

>> 3. Encourage all gardeners to leave a ‘wild corner’ of their garden for nature

>> 4. Extend the work of Restoring Shropshire Verges Project throughout the Strettons

>> 5. To link with other projects, nature reserves, Stepping Stones, National Landscape

>> 6. Develop nature recovery plans for each of the Strettons
